

Representing Innovative Equipment Manufacturers for Over 40 Years!

PROCESS MEASUREMENT & INSTRUMENTATION

100+ years tradition of excellence and innovation in process instrumentation. High quality measurement solutions including level, flow, pressure, temperature and valve positioners.

SCADA & TELEMETRY

Systems monitor and control field operations across a widely dispersed infrastructure. From simple reservoir level measurements and pipeline monitoring to emerging ERP-integrated optimization initiatives.

PROCESS WEIGHING SOLUTIONS

Hardy offers a broad line of process weighing instrumentation, load cells, sensors and scales for use in a variety of applications.

FIBER OPTIC SENSING

Conveyor Health Monitoring, Power Cable Monitoring, Pipeline Monitoring and Leak Detection, Perimeter Security and Threat Detection. The Praetorian Fiber Optic Sensing is a plant and site wide single solution for detecting when critical parts of the idler are beginning to fail.

POWER QUALITY & ENERGY OPTIMIZATION

Electromagnetic Energy Solutions specializes in solutions for power quality and energy optimization including voltage balancing, surge suppression and VAR compensation on low, medium and high voltage systems.

DIGITAL DISPLAYS

Digital devices that transform display and control critical process information.

GAS CONDITIONING

Worldwide leader in unique gas conditioning products including dryers, humidifiers, fieters, coalescers and complete systems.

MEDIUM VOLTAGE DRIVES

SINAMICS PERFECT HARMONY GH150 is the largest, single-channel, air-cooled VFD in the world.

PROCESS ANALYTICS

Extractive continuous process gas analytics. Siemens has a range of devices with different technologies for extractive measurement methods. Operation of devices is menu-driven and designed according to NAMUR guidelines.

HEATING SOLUTIONS

Electric Industrial air heaters for demanding high-temperature applications.

GAS DETECTION

Ino-Tek is a nationally recognized leader in the design, installation and service of Code-Compliant gas detection, leak detection and life safety systems.

TURBIDITY & SUSPENDED SOLIDS INSTRUMENTS

Four beam Alternating Light Principle designed to improve the measurement reliability of optical suspended solids and turbidity instruments, compensating for most sources of measurement error.

SERVICE & MAINTENANCE

Unparalleled service and maintenance for all equipment sold by HESCO and HESCO Industrial.

COMBUSTION, FLUE GAS & EMISSIONS ANALYZERS

An industry leader at the forefront of innovation and technology. Solid engineering and attention to detail ensure that in any application, your measurements are accurate and reliable.

WATER TREATMENT

Pre-engineered treatment plants and pump stations designed to provide long-term value with long-lasting, durable equipment that minimizes the need for daily operation and maintenance.
